

*Summer is for splashing  
in the pool-not getting  
splashed in the face!*

## DON'T FORGET STANDARD PRECAUTIONS!

Put on mouth, nose, and eye protection if a procedure is likely to generate splashes or sprays of blood or body fluids

## YOU MIGHT GET SPLASHED WHEN YOU:

- empty a urinary catheter
- insert a urinary catheter
- perform aerosol-generating procedures
- care for a sneezing or coughing patient
- perform a blood draw on a combative patient
- assist with delivering a baby
- perform a dental procedure
- do wound care on a draining wound
- ...and MORE!
